ABOUT ME

Computer science graduate with hands-on experience in frontend and backend development, as well as API design. Proficient in JavaScript, React, Python, and Django, with a strong focus on building scalable and secure web applications. Demonstrated problem-solving skills and a commitment to contributing to innovative software development projects.

EDUCATION

University of Gondar | 2021-2025

Computer Science

Graduated with honours.

Relevant Courses: Data Structures and Algorithms, Web development, Machine Learning, and Object-Oriented Programming.

RELEVANT EXPERIENCE

University of Gondar | 2025

Backend Development Internship

Developed and integrated APIs to enhance system functionality.

Designed and optimized databases for improved data management.

Implemented authentication protocols to ensure security standards.

Enhanced performance and scalability of applications for increased efficiency.

RELEVANT PROJECTS

CAMS - College Academics Management System

Stack: React, Tailwind CSS, TypeScript, Java, SpringBoot.

Developed a centralized platform for universities to manage courses, student records, and faculty workflows, reducing manual tasks by 60%. Developed this project as a final year project with a team collaboration.

SKILLS

- Frontend development: JavaScript, React, HTML, CSS
- Backend development: Django, Node.js, RESTful APIs
- Python programming
- Web development
- API integration
- Database design
- Performance optimization
- Team collaboration
